

SCANGRIP NOVA MINI

Compact floodlight with SMART GRIP providing 1,000 lumens

With its extremely compact and unique design, the SCANGRIP NOVA MINI is a hand-held floodlight and the ultimate “must-have” for professionals in all industries.

Featuring the latest LED technology, NOVA MINI is incredibly powerful and provides up to 1,000 lumens – which is unique for such a small lamp. NOVA MINI is supplied with a practical on/off button on the side that also acts as a light control. Simply adjust the light output with the stepless dimmer function from 10% to 100%.

As part of the popular SCANGRIP NOVA family, NOVA MINI is based on all the same unique and well-known features that the NOVA series is known for. With its compact dimensions of only 104x38x96 mm, it is more than twenty times smaller than the SCANGRIP NOVA 10K and fits perfectly into your pocket.

The lamp is supplied with a special, patented SMART GRIP 4-in-1 system that integrates several multi-functions in the same unit. The SMART GRIP 4-in-1 system relieves muscles and increases ergonomics, thus making it easier and more convenient to keep the lamp in your hand for a long period of time.

The clip is designed to fit the work belt and carry the lamp the entire day, and when both hands are needed for a task, the built-in magnet can be used for flexible positioning. Furthermore, the SMART GRIP 4-in-1 system can be used as a stand on any available surface.

A charge indicator on the side of the lamp keeps you informed about the battery level.
