

Connectivity and Access Unit

The CAU (Connected Access Unit) is a compact, efficient, and secure solution for seamless vehicle access and connectivity.

Designed on a single-board architecture, it integrates advanced connectivity features like Live Tracking, Passive Entry, and Key Sharing, making it ideal for eBikes, tractors, and more.

CONNECTIVITY AND ACCESS UNIT

BENEFITS

- Updated Bluetooth version (BLE 5.2) support
- Product with dual connectivity – BLE + LTE(4G)
- Very compact design – eBikes and Tractors etc

FEATURES

- Vehicle access features – Passive entry, find-me/follow-me, Live tracking
- Passive Access and Digital Key (Key Sharing)
- IMU sensors integrated
- Model + GNSS solution
- RSL15 microcontroller- based design
- TCAN4550 available
