mega macs PC

NEW
Comprehensive diagnostic work with a PC for all relevant makes and models

Pimp your PC

**UPGRADE YOUR SHOP PC**
TO A COMPREHENSIVE DIAGNOSTIC TOOL

# Full Diagnostic Power

The new and completely revised diagnostic software of the mega macs PC provides workshops with the full scope of applications at a reasonable price without the need of investing in an additional tool. Just upgrade your workshop PC*.

The scope of functions of the mega macs PC comprises fault code readout and deletion, graphic indication of parameters, actuator tests, basic settings, codings, service resets and the automatic storage of vehicle data. You can broaden this scope by combining the mega macs PC with the Repair Plus Light licence to access a broad range of data and background information. Then you can access e.g. component help texts, service data, timing belt data, technical data, wiring diagrams, fuses, component test values, flat rate units exhaust emission data, recall campaigns directly on your laptop, tablet or workshop PC.

## Survey of applications

- **NEW!** the first comprehensive diagnostic software of Hella Gutmann

- ✓ **fault code readout and deletion in all ECUs**

- **NEW!** numerical and graphic parameter depiction (8 parameters)

- **NEW!** actuator tests

- ✓ **service resets of all systems**

- **NEW!** codings and basic settings of all systems

- ✓ **wireless communication**

- ✓ **fast and explicit vehicle identification**

- **NEW!** the full scope of technical data and diagnostics in one solution*

- **NEW!** integrated wiring diagrams, fuses/relays, flat rate units, timing belt data etc.

- ✓ **regular updates****

- ✓ **etc.**

**One thing less to worry about**

Comprehensive diagnostic tools have been closely related to major investments in hardware so far. Now the mega macs PC is offering you an unrestricted solution in the daily work without the need of a premium device.

The mega macs PC is therefore not only the ideal supplement to your existing tools but it also provides a perfect start into the diagnostic world of Hella Gutmann Solutions.

Communication between vehicle and workshop PC via the mega macs PC is realised wireless within a radius of up to 50 m. The vehicle's VIN is read out automatically - mistakes or erroneous entries can thus be excluded from the start. Read-out fault codes, changes of the basic settings and codings are saved in the Car History and are hence accessible at any time. In the long view this is an ideal basis for customer loyalty.

* Only on Windows-based systems/devices (except RT).
** In connection with the Repair Plus Light package.

# UPGRADE YOUR PC

Workshops require not only experience and expert knowledge but also any support in handling the more and more complex vehicle electronics. The mega macs PC software is the first product of Hella Gutmann Solutions with which mechanics can upgrade their workshop PC to a highly efficient service tool.

Adapting sensors, resetting values or switching systems on and off will no longer be a problem as you can do that with your Windows-based PC, laptop or tablet PC. Installation and menu navigation are easy and self-axplanatory as usual. The wireless check of all ECUs is no problem with the mega macs PC, the same holds for reading and deleting fault codes or doing service resets. With the mega macs PC you can upgrade your PC without additional hardware which results e.g. in shorter repair times and increased turnover.

# Automotive diagnostics for a new generation of workshops

**The mega macs PC software has been developed to keep utmost flexibility in working. You just need a PC, a laptop or a tablet PC for software installation and the single workflows for vehicle check-in, service work, troubleshooting and repair work can be made much more efficient.**

### A step ahead

The mega macs PC speeds up your workflows and facilitates several working steps. No matter if you have urgent services or if there are tricky faults - the software supplies with all the necessary technical data* and shortens certain procedures.

The mega macs PC software enables the communication to all important vehicle systems and delivers exact diagnostic results. The results of technical work are stored in the Car History and can be printed out any time. You can present these results to customer should there be any case for complaint. Moreover, the software reports any recall campaings of manufacturers and importers so that you are again one or two steps ahead.

### At a glance

The mega macs PC is capable to numerically and graphically depict up to 8 parameters at the same time together with important additional information.

### Plug and work

Installation of mega macs PC is done in no time thanks to plug and play - without complicate and tedious release procedures. You can start working instantly and benefit from the extensive advantages of the mega macs PC.

### Including the best

With the extra option Repair Plus Light you will moreover receive unrestricted access to all the relevant technical data on more than 35,000 models included in our large diagnostic database – including filling quantities, timing belt data, flat rate units and invaluable repair tips.

Your Hella Gutmann sales partner will be glad to inform you about the various advantages and the potential of the mega macs PC.

No matter if Tablet-PC, laptop or shop PC – the mega macs PC always provides full diagnostic power.

* Precondition: Repair Plus Light licence.

# Technical data

| SYSTEM REQUIREMENTS | |
|---|---|
