

Mercedes C-Class - air conditioning function

Data sheet

Manufacturer

Mercedes

Vehicle model

C-Class (205)

Engine

All models

Year of manufacture

2014 -

Symptoms

Air conditioning function

Important safety note

Air conditioning malfunction

On the vehicles mentioned above, a non-functioning LED may suggest an air conditioning failure.

If the LED of the function/switch-on control in the air conditioning control unit fails, this may imply that the air conditioning is not switching on/functioning.

The operating/control unit should be replaced to rectify the problem. Before replacing the air conditioning system, it is recommended that you check that the air conditioning is functioning correctly using a service or diagnostic device.
