

Toyota Yaris - faulty activation of the parking aid

Data sheet	
Manufacturer	Toyota
Vehicle model	Yaris (1KR-FE)
Engine	All models
Year of manufacture	2011 - 2020
Symptoms	Parking aid

Important safety note

Parking aid beeps without obstacle

On the vehicles mentioned above, the parking aid can activate without there being an obstacle. Sometimes, this suddenly causes acoustic warning signals to sound.

If other causes (electrical components/sensors) can be ruled out as faults, there is probably a defect in the parking aid control unit. This should be replaced to rectify the problem. Contacting a Toyota dealership is advisable.
