

Volvo V60 (155/157) - Service connection of the air conditioning system | HELLA

Volvo

V60 (155/157)

Model year: 2010 - 2018

Service connection of the air conditioning system

If the low-pressure service connection of the air-conditioning system in the engine compartment is not immediately visible on the above-mentioned vehicle, it can be found located below the water tank cover (cowl cover).

In order to gain access to the low-pressure connection,

please proceed as follows:

- Dismantle wiper arms
- Remove fastening plug of the cowl cover
- Remove cover

The service connection is now visible in the middle of the water tank (Fig.1+2).

The high-pressure service connection is located between the storage tanks for steering oil and cooling water.

The specified torque of the caps or plugs is 6 Nm.
