

LHM+ hydraulic fluid | HELLA

General information

HELLA LHM+ is a mineral-oil-based hydraulic fluid. The abbreviation LHM comes from the French term Liquide Hydraulique Minerale. LHM+ is compatible with all other, earlier LHM fluids.

The green, non-hygroscopic hydraulic fluid is used in the central hydraulic systems of many Citroen vehicles. Depending on the vehicle model, it can act as a medium for the brake system, steering, hydropneumatic suspension system or transmission.

Areas of application

This hydraulic fluid is also used in the following vehicle systems:

- Power steering
- Ride-height leveling
- Stability and traction control systems
- Suspension and damping systems

- Electro-hydraulic convertible hood control system

Assembly instructions

Before filling, care must be taken to ensure that the correct fluid is being used. The vehicle-specific repair and maintenance instructions must also be observed.

LHM+ hydraulic fluid can be mixed with any other LHM fluid.

Disposal

LHM+ Hydraulikflüssigkeit muss separat gesammelt und entsorgt werden.

Bitte beachten Sie auch in diesem Zusammenhang das Sicherheitsdatenblatt des Produktes.

Produktinformation

LHM+ must be collected and disposed of separately.

When doing so, please observe the product's safety data sheet.
