

## **Opel Astra-G, Zafira Model year 2003, engine Y22DTR, Y20DTH**

### **Fault code P0400 stored in the control unit, engine warning light illuminates.**

If there are complaints with these vehicles that the engine warning light illuminates and that fault code P0400 (exhaust gas recirculation – faulty flow rate function) is stored in the control unit, this could be caused by a software deviation. In this case, the fault is not caused by the EGR. The fault is caused by the EGR regulation in the software being too sensitive.

To eliminate the fault, a new, up-to-date software status must be installed in the control unit.
