

## **Opel Corsa C Model year 2003 With engine: Z10XEP, Z12XE, Z14XEP**

### **Engine judders and has no power. Fault code P0100 or P0170 stored.**

If there are complaints with these vehicles that the engine judders, has no power and the fault code P0100 or P0170 is stored, one possible cause can be a wrong mass air flow meter. In this case a mix-up can have led to the wrong mass air flow meter being installed. Mass air flow meters for Z10XEP and Z14XEP engines can have been built into Z12XE engines and vice versa. If such complaints are made, check the number on the mass air flow meter and replace this part with the correct one if appropriate.

The following numbers must be on the correctly installed mass air flow meters:

Engine Z10XEP / Z14XEP = Bosch no.: 0 280 218 119

Engine Z12XE = Bosch no.: 0 280 218 031
