

## *Ford Transit, build since 08.95 - 12.97*

Temporary or total loss of the side lamps or panel lamp

### **To rectify the problem:**

Renew the light switch plug

1. Disconnect battery
2. Remove steering column trim
3. Disconnect plug from the light switch, partially remove some insulation from the wiring harness
4. Cut the cables approx. 4 cm behind the plug
5. Cut the loom cables to custom-fit the new plug, remove insulation
6. Fit the new plug with solder-/ crimp connections
7. Connect the plug to the light switch
8. Refit the steering column trim, reconnect battery
